

MOHAMMAD ALI AZIMI

MENG CIVIL ENGINEERING GRADUATE | MUNICIPAL INFRASTRUCTURE | FIELD & DESIGN SUPPORT

Windsor, Ontario | (226) 758-8625 | m.ali.azimi2023@gmail.com | linkedin.com/in/mohammad-ali-azimi-civil | darkbluealii.github.io

PROFESSIONAL SUMMARY

MEng Civil Engineering graduate with a Canadian postgraduate certificate in Construction Project Management and more than six years of international experience in municipal infrastructure, construction inspection, QA/QC, materials testing, CAD drafting, field studies, and project coordination. After relocating from Afghanistan to Canada, completed both Canadian credentials while strengthening knowledge of local construction practice, documentation, safety, and project delivery.

CORE QUALIFICATIONS

- Municipal infrastructure, water-supply systems, construction observation, site inspection, and field investigations
- QA/QC documentation; concrete, reinforcement, formwork, structural-work, materials, and workmanship inspection
- Soil, aggregate, and concrete testing: Proctor, CBR, sieve, field density, slump, air, temperature, and compressive strength
- AutoCAD drafting; Civil 3D study and practice; drawings, revisions, markups, field measurements, and quantity checks
- Technical reporting, schedules, estimates, stakeholder coordination, and organized project documentation

CIVIL ENGINEERING EXPERIENCE

Team Leader - Engineering Field Studies

[Volfat Consultancy Services](#) | Bamyan Province, Afghanistan | Nov 2020 - Aug 2021

- Led a five-person team completing field investigations and feasibility assessments for water-resource and renewable-energy assignments.
- Coordinated GPS records, measurements, technical evaluations, reports, presentations, proposal inputs, and stakeholder consultations.

Freelance CAD Drafter

[Independent Projects](#) | Kabul, Afghanistan | Sep 2019 - Nov 2020

- Prepared and revised AutoCAD site, foundation, floor, roof, reinforced-concrete, section, detail, and schedule drawings.
- Used field measurements and technical markups, coordinated revisions, and maintained organized drawing records.

Quality Control Engineer / Site Supervisor

[KHCC](#) | Kabul, Afghanistan | Jun 2018 - Aug 2019

- Inspected excavation, reinforcement, formwork, concrete, structural work, materials, and workmanship against drawings and specifications.
- Prepared field and QA/QC reports, documented deficiencies, and coordinated corrective actions with project teams and municipal inspectors.

Quality Control Engineer / Site Supervisor

[Asia Decor Construction Company](#) | Kabul, Afghanistan | Jun 2017 - Jun 2018

- Performed construction observation and QA/QC monitoring for civil and building work, including dimensions, concrete, masonry, and structural work.
- Maintained inspection records and daily reports while coordinating deficiencies and corrective work.

Laboratory Technician - Soil & Concrete Testing

[Truth Land Construction Company](#) | Kabul, Afghanistan | Jan 2016 - Jun 2017

- Performed soil, aggregate, and concrete sampling and testing for a 45-km municipal drinking-water pipeline.
- Completed field density, Proctor, CBR, sieve, slump, air, temperature, and compressive-strength testing with accurate records.

Laboratory Technician - Geotechnical Testing

[Pamir Geotechnical Services Company](#) | Kabul, Afghanistan | Feb 2013 - Dec 2014

- Supported field and laboratory classification and strength testing of soil and aggregate samples using standard procedures.
- Prepared samples, maintained equipment and structured records, and summarized results for engineering review.

EDUCATION

Master of Engineering (MEng), Civil Engineering

University of Windsor | Windsor, Ontario | Completed Aug 2026

Coursework: Earthquake Engineering, Finite Element Methods, Structural Dynamics, Sustainable Concrete Materials Systems, Water and Wastewater Treatment, Engineering Mathematics, Technical Communications, and Project Management.

Postgraduate Certificate, Construction Project Management

St. Clair College | Windsor, Ontario | Sep 2024 - Apr 2025

Canadian construction coursework in estimating, scheduling, contracts, procurement, safety, quality, and project controls.

Bachelor of Science (BSc), Civil Engineering

Avicenna University | Kabul, Afghanistan | 2012 - 2015

WES assessment: Canadian bachelor's degree equivalency.

SELECTED ENGINEERING PROJECTS

Seismic performance with fluid viscous dampers | Individual project

Built a three-storey reinforced-concrete ETABS model and compared layouts and damping coefficients under Loma Prieta and Northridge records. Distributed dampers with $C_{total} = 1,800 \text{ kN-s/m}$ gave the strongest overall response control.

Recycled concrete base vs. virgin aggregate | Project lead and lead analyst

Led openLCA modelling, scaling, verification, sensitivity analysis, reporting, and coordination for a 20-km road-base comparison. The recycled-concrete scenario modelled 27.4% lower GWP.

Finite-element mesh verification | Two-person project

Built five Abaqus plane-stress models to evaluate aspect-ratio effects. Near-square elements reduced tip-deflection error from 45.92% to 2.95%.

Sensor-based municipal water monitoring | Project manager

Directed a four-person assessment of pressure sensing, targeted acoustic monitoring, and a central data platform for Ontario municipalities.

TECHNICAL TOOLS

AutoCAD (intermediate) | Civil 3D (study and practice) | ETABS | Abaqus/CAE | MATLAB | openLCA | Microsoft Excel (advanced) | Microsoft Project

CERTIFICATIONS AND ADDITIONAL INFORMATION

- WHMIS; Working at Heights; Worker Health and Safety Awareness
- Available for field and office assignments and open to opportunities across Canada
- Portfolio: darkbluealii.github.io
